

WHICH BUILDINGS CAN REACH & WASH ACTUALLY CLEAN?

Affiliated with the Ladders Free scheme, we proudly employ the Reach & Wash system here at Scott & Sons, and have highlighted the types of buildings it can be used for so you can clearly see the advantages of using this clever window cleaning system!

HOMES

Can clean a home's window far easier than other traditional methods. Also cleans conservatories and solar panels in order to maintain their efficiency.

Height = approx 20 feet

SHOPS

Our systems circulate pure water that leaves no marks and dries spot-free.

Height = approx 20 feet

FACTORIES

Ideal for getting those hard to reach areas of a window.

Height = up to 65 feet

OFFICE BUILDINGS

Window cleaners can work from the safety of the ground using our long poles - no ladders required!

Height = approx 60 feet

HOTELS

It has been said that this system is twice as fast as any traditional window cleaning method.

Height = up to 65 feet

Reach & Wash is not limited to these five building types and is an appropriate cleaning method for many other buildings too, including nursing homes, schools, department stores and many more. And where traditional window cleaning is appropriate, Scott & Sons are more than happy to offer this too!
